### **LETTER OF RECOMMENDATION**

In November of 2008 we had a solar-panel hot water system installed by a company called Powerzone.

This system was neatly installed and has proved to be a great asset to the Mission.

I can highly recommend that if you are considering to install a solar-panel hot water system in the near future, use this company. Their team are really skilled workers and most obliging.

A handwritten signature in black ink that reads "Dirk Venter".
